EDUCATION

- Peter A. Allard School of Law, University of British Columbia** — JD Sept 2022 – May 2025 | Vancouver, BC
- Stan Smith Memorial Prize in Contract Law (academic excellence)
 - Bar admission: Law Society of British Columbia (2026)
- University of Alberta** — MSc, Statistical Machine Learning Sept 2019 – May 2022 | Edmonton, AB
- 4.0 GPA · Thesis on fairness and discrimination in machine learning
- University of Ottawa** — BSc, Mathematics (Hons.) & BSocSc, Political Science & Economics Sept 2010 – Dec 2016 | Ottawa, ON
- Graduated Summa Cum Laude

WORK EXPERIENCE

McCarthy Tétrault LLP — Business and Technology Lawyer May – Aug 2024; Sept 2025 – present | Vancouver, BC

Dual role across the firm's Business Law group and its AI innovation team. Summer 2024; returned September 2025 on completion of the JD (May 2025).

AI Innovation Team

- Evaluate, select and roll out AI tools across the firm and design AI-enabled workflows into legal practice.
- Build bespoke AI tools for high-volume legal work.
- Built the firm's AI training materials and workflow guidance, now rolled out firm-wide (approximately 1,000 lawyers), and train lawyers on effective and responsible use.
- Advise enterprise clients on AI governance, including an AI impact assessment and governance protocols built on the NIST AI Risk Management Framework, ISO/IEC 42001 and the EU AI Act.
- Deliver educational talks on how AI and large language models work to non-technical legal audiences — to every practice group in the Vancouver office and on national calls reaching over 100 lawyers.

Business Law & Regulatory

- **Private M&A & Private Equity:** Drafted ancillary documents, ran due diligence and managed closing folders on (1) Hg Capital's US\$2.3B sale of Intelrad Medical Systems to GE HealthCare (a transaction involving pre-closing equity cleanup, amalgamations and Investment Canada Act approval), (2) Vantage Airport Group's acquisition of FSM Management Group and AvEnergy Management Services (involving multiple sellers, seller-note subordination and RWI), and (3) a C\$90M sale of a business by its management shareholders (involving a pre-closing reorganization, rollover, a reverse earn-out and acquisition financing); and conducted IP due diligence on SPX Technologies' C\$605M cross-border acquisition of Neptronic.
- **Public M&A & Securities:** Due diligence and transaction support on Crestpoint Real Estate Investments and Minto Group's C\$2.3B take-private of Minto Apartment REIT by plan of arrangement (a transaction involving a management information circular, court order, de-listing, Competition Bureau clearance and post-closing joint venture); helped draft the issuer bid circular and worked through the bid mathematics for a listed biotechnology company's US\$230M substantial issuer bid; and supported public-company governance for a dual-listed issuer (NCIB, proxy and annual meeting materials, shareholder rights plan, TSX and securities-law filings).
- **Regulated Industries & Financings:** Navigated gaming-regulatory requirements and ran due diligence, ancillary documents and closing folders on four regulated gaming acquisitions totalling over C\$900M (Petroglyph Development Group and Snuneymuxw First Nation's acquisitions of River Rock Casino Resort, Casino Vancouver and Chances Casino Maple Ridge, and a fourth casino acquisition for a separate First Nation client; BCLC consents, tripartite arrangements and gaming-site approvals); conducted material-contract and mining-lease due diligence on a strategic mining acquisition; managed the closing agenda and drafted ancillary documents on Eagle Eye Asset Holdings' US\$160M metal streaming financing with Toubani Resources; assisted with the subscription agreement on a preferred equity financing of over C\$200M and the investor rights agreement on a staged mining earn-in; drafted a C\$7.3M secured convertible loan agreement (TSX approval) and an offering memorandum for a mortgage investment issuer; and assisted with the offering memorandum for the dealer syndicate on Vancity Credit Union's inaugural C\$325M senior deposit notes offering.
- **Technology, IP & AI:** Conducted IP due diligence (software and IP risk) on a ~C\$900M proposed acquisition of a retail group and on SPX Technologies' C\$605M acquisition of Neptronic; edited a long-term AML services and supply master services agreement for

a major utility to incorporate its positions; assisted with patent application materials; and assisted with a response to a securities commission on crypto-asset regulation.

Statistics Canada — Senior Data Scientist

Jan – Aug 2019; May – Aug 2022 | Ottawa, ON

- Led a team of 4 data scientists modernizing Consumer Price Index data collection and calculation using advanced machine learning and statistical techniques
- Organized, developed and delivered a machine learning seminar series to over 100 participants across multiple teams and organizations; supervised data scientists on automation of statistical products

Alberta Machine Intelligence Institute (Amii) — Machine Learning Consultant

May – June 2022 | Edmonton, AB

- Collaborated with the Digital Governance Council to create educational materials and deliver a workshop on fair and ethical machine learning for Canadian business leaders

Employment and Social Development Canada — Data Scientist and Researcher

Jan 2017 – Jan 2019 | Gatineau, QC

- Built AI and NLP tools automating manual departmental processes, and delivered statistical and machine-learning analysis across a wide range of projects for teams throughout ESDC under a client-based delivery model.
- Acted as communicator and translator of technical information and client needs between non-technical clients and data scientist colleagues

University of Alberta & Peter A. Allard School of Law — Research Assistant

June – Aug 2023 | Vancouver, BC

- Led an interdisciplinary research project on inequality and discrimination arising from AI algorithms, and the impact of recommender systems in shaping information ecosystems and political preferences, with Dr. Kristen Thomasen and Dr. Nidhi Hegde

SELECTED PROJECTS

M&A Due Diligence Automation Tool — independent project (2025 – present). Web application replicating the senior-to-junior diligence workflow: ingests large sets of commercial agreements and produces structured, user-defined diligence tables with export to Word and Excel. React front end, Python back end, LLM extraction layer; built and evaluated against generated synthetic agreement sets. Product and engineering specification prepared for co-founder handoff.

M&A market analytics and closing workspace — independent prototypes (2026). Extracted structured deal terms from several hundred public M&A agreements into a dataset that can be filtered, benchmarked and searched by clause; and built a shared closing-agenda and document workspace for multi-firm deal teams with version history and Word redlines.

Additional legal-workflow prototypes — independent projects, synthetic data. Prototype tools automating IP domain-name ownership searches, securities-form checks, and regulatory-form compliance review.

PUBLICATIONS & WORKING PAPERS

Peer-reviewed (machine learning)

Long Term Fairness for Minority Groups via Performative Distributionally Robust Optimization. Liam Peet-Pare, Nidhi Hegde, and Alona Fyshe. Responsible Decision Making in Dynamic Environments Workshop, International Conference on Machine Learning (ICML) 2022.

Resonance in Weight Space: Covariate Shift Can Drive Divergence of SGD with Momentum. Kirby Banman, Liam Peet-Pare, Nidhi Hegde, Alona Fyshe, and Martha White. International Conference on Learning Representations (ICLR) 2022.

Beyond Static Classification: Long-term Fairness for Minority Groups via Performative Prediction and Distributionally Robust Optimization. Liam Peet-Pare. Thesis for MSc in Statistical Machine Learning, University of Alberta.

Working papers (AI & law)

AI Unreliability and the Law: How to Use AI Safely and Responsibly in Legal Practice. Liam Peet-Paré and Barry Sookman. Working paper, 2026.

AI Regulation in Canada: Maintaining Economic Competitiveness while Avoiding Legal Vacuums and Catastrophic Risk. Liam Peet-Paré and Barry Sookman. Working paper, 2026.

ADDITIONAL

- **Law and Technology Club** — Co-President and Presenter (2022 – 2025): organized and hosted panels with members of the legal and technology community; explained complex AI concepts to non-technical audiences
- **UBC Law Review** — Assistant Editor (2022 – 2023) · **UBC Law Students' Society** — Academic Representative (2023 – 2024)
