Vancouver, BC · Canadian citizen

EDUCATION

Peter A. Allard School of Law, University of British Columbia — JD Sept 2022 – May 2025 | Vancouver, BC

- Stan Smith Memorial Prize in Contract Law (academic excellence)
- Bar admission: Law Society of British Columbia (2026)
- *Law and Technology Club*: Co-President and Presenter
- *International Justice and Human Rights Clinic*: One of three students to travel to Geneva to support the Canadian representative to the United Nations Human Rights Committee
- *UBC Law Review*: Assistant Editor, *UBC Law Students' Society*: Academic Representative

University of Alberta — MSc, Statistical Machine Learning Sept 2019 – May 2022 | Edmonton, AB

- 4.0 GPA; ICLR 2022 paper and ICML 2022 workshop paper

University of Ottawa — BSc, Mathematics (Hons.) & BSocSc, Political Science & Economics Sept 2010 – Dec 2016 | Ottawa, ON

- Graduated Summa Cum Laude

WORK EXPERIENCE

McCarthy Tétrault LLP — Business and Technology Lawyer May – Aug 2024; Sept 2025 – present | Vancouver, BC

Dual role across the firm's Business Law group and its AI innovation team. Summer 2024; returned September 2025 on completion of the JD (May 2025).

AI Innovation Team

- Evaluate, select and roll out AI tools across the firm and design AI-enabled workflows into legal practice.
- Build bespoke AI tools for high-volume legal work.
- Build the firm's AI training materials and workflow guidance, now rolled out firm-wide (approximately 1,000 lawyers), and train lawyers on effective and responsible use.
- Deliver educational talks on how AI and large language models work to non-technical legal audiences — to every practice group in the Vancouver office and on national calls reaching over 100 lawyers.

Business Law & Regulatory

- **Corporate, M&A & Securities**: Drafted ancillary agreements, ran due diligence, and managed closing mechanics and regulatory requirements across 20+ transactions in private and public M&A, securities, capital markets and regulated industries — including Hg Capital's US\$2.3B sale of Intelrad Medical Systems to GE HealthCare, Crestpoint and Minto Group's C\$2.3B take-private of Minto Apartment REIT, over C\$900M of regulated gaming acquisitions, and Vancity Credit Union's inaugural C\$325M senior deposit notes offering.
- **Intellectual Property, Technology & Regulatory**: Assisted with patent application materials; conducted IP due diligence on cross-border acquisitions including a ~C\$900M retail-group transaction and SPX Technologies' C\$605M acquisition of Nepronic; edited a long-term technology procurement and master services agreement for a major utility; and assisted with a response to a securities commission on crypto-asset regulation.
- **AI & Technology**: Drafted AI-specific contract provisions and SaaS agreements; analyzed AI-vendor and consulting agreements for data-retention, IP, indemnity and market-position issues; and advised enterprise clients on AI governance, including an AI impact assessment and governance protocols.

University of Alberta & Peter A. Allard School of Law — Research Assistant June – Aug 2023 | Vancouver, BC

- Led an interdisciplinary research project on inequality and discrimination arising from AI algorithms, and the impact of recommender systems in shaping information ecosystems and political preferences, with Dr. Kristen Thomasen and Dr. Nidhi Hegde

Statistics Canada — Senior Data Scientist Jan – Aug 2019; May – Aug 2022 | Ottawa, ON

- Led a team of 4 data scientists modernizing Consumer Price Index data collection and calculation using advanced machine learning and statistical techniques
- Organized, developed and delivered a machine learning seminar series to over 100 participants across multiple teams and organizations; supervised data scientists on automation of statistical products

Alberta Machine Intelligence Institute (Amii) — Machine Learning Consultant

May – June 2022 | Edmonton, AB

- Collaborated with the Digital Governance Council to create educational materials and deliver a workshop on fair and ethical machine learning for Canadian business leaders

Employment and Social Development Canada — Data Scientist and Researcher

Jan 2017 – Jan 2019 | Gatineau, QC

- Built AI and NLP tools automating manual departmental processes, and delivered statistical and machine-learning analysis across a wide range of projects for teams throughout ESDC under a client-based delivery model.
- Acted as communicator and translator of technical information and client needs between non-technical clients and data scientist colleagues

PUBLICATIONS & WORKING PAPERS

Peer-reviewed (machine learning)

Long Term Fairness for Minority Groups via Performative Distributionally Robust Optimization. Liam Peet-Paré, Nidhi Hegde, and Alona Fyshe. Responsible Decision Making in Dynamic Environments Workshop, International Conference on Machine Learning (ICML) 2022.

Resonance in Weight Space: Covariate Shift Can Drive Divergence of SGD with Momentum. Kirby Banman, Liam Peet-Paré, Nidhi Hegde, Alona Fyshe, and Martha White. International Conference on Learning Representations (ICLR) 2022.

Beyond Static Classification: Long-term Fairness for Minority Groups via Performative Prediction and Distributionally Robust Optimization. Liam Peet-Paré. Thesis for MSc in Statistical Machine Learning, University of Alberta.

Working papers (AI & law)

AI Unreliability and the Law: How to Use AI Safely and Responsibly in Legal Practice. Liam Peet-Paré and Barry Sookman. Working paper, 2026.

AI Regulation in Canada: Maintaining Economic Competitiveness while Avoiding Legal Vacuums and Catastrophic Risk. Liam Peet-Paré and Barry Sookman. Working paper, 2026.

SELECTED PROJECTS

See lpeetpare.github.io for examples of prototype applications.

- **M&A Due Diligence Automation Tool** – Web application built to automate high-volume diligence on M&A deals. Ingests large sets of documents and produces structured, user-defined diligence tables with export to Word and Excel. React front end, Python back end, LLM extraction layer. Similar to tabular analysis tools in Legora and Harvey.
- **Public M&A Market Analytics** – Scrapes EDGAR for public M&A agreements and ingests agreements and ancillary documents into an LLM pipeline to extract analytics. React front end, Python back end, LLM extraction layer. Allows for deal benchmarking and determination of market dynamics and trends.
- **Coordinated deal closing space** – A web app that allows for much more efficient deal coordination and closing dynamics, particularly for complex paper-heavy deals across several jurisdictions.
- **Additional legal-workflow prototypes** – Prototype tools automating IP domain-name ownership searches, securities-form checks, and regulatory-form compliance review.

TECHNICAL

- **Machine learning & statistics:** MSc-level mathematical foundations with deep understanding of machine learning theory; PyTorch and scikit-learn implementation for experiments; applied statistical modelling and production ML at Statistics Canada and ESDC.
- **AI policy & governance:** AI impact assessment; governance frameworks for enterprise deployment (NIST AI RMF, ISO/IEC 42001, EU AI Act); Canadian and cross-border AI regulation; fairness, discrimination and distributional harm.
- **Building:** Python, R, SQL, React; designs and builds working applications using agentic development tools; synthetic-data generation and testing.

INTERESTS

- Travel (I have lived across 5 continents and 7 Canadian provinces and territories), hiking, trail running, and backcountry camping (I have trekked in jungles, mountains, rainforests, and deserts), languages (conversational French, beginner Spanish), athletics (I played soccer, hockey, basketball, and tennis at competitive levels), literature, philosophy, and poetry (I have written and performed spoken-word poetry)
